DISPLAY

DISPLAY

Display solutions are one of the most popular and impactful visual communication media on the market.

Whether it is for frequent and regular use or for a durable fixed arrangement, a multitude of solutions exists and for any budget.

To successfully communicate your messages and brand at point of sale, shows and events it is essential to understand:

- The environment in which the display will be exhibited.
- Whether the display will be renewed and how frequently.
- The quality appropriate to the event and relative to the desired budget.
- How to accessorise the product to increase its functionality.
- It is essential to stand out from the competition with high-end, original solutions that distinguish your brand from the competition.

This comprehensive guide offers you a wide choice of products. We will help you find the best solution suited to your needs.

Guarantee

All products are covered by a manufacturer's guarantee against component failure and defects. Our premium banner range is covered by a lifetime guarantee, the rest of our range is covered by a five year guarantee with the exception of our Illuminated, Economy, Basics and Outdoor products which are covered by a one year guarantee.

We are continually improving and modifying our product range and reserve the right to remove products or vary the specifications without prior notice. All dimensions state height first. All dimensions, graphic information and any weights quoted are approximate and should be used as a guide only. We accept no responsibility for variance. E&OE

Roller Banners

Simple, stunning, stylish – banners are still one of the most popular, effective and easy ways to promote your business and get your message across in a wide variety of environments.

With one of the most comprehensive ranges on the market, our banners are designed to suit every budget and fit all situations. From single to frequent use and multiple changing of graphics.

Roller Banners are one of the most popular and effective communication tools available.

Using our solutions will exceed your expectations, whatever your needs may be, from desktop, retail outlets, exhibition stands to the office environment.

We have one of the widest ranges of both economy and premium Roller Banners on the market, with widths ranging from 600mm to 3000mm! It's therefore important to choose the right one for your needs. Here is a quick guide explaining what you should consider.

When Choosing Your Roller Banner Ask Yourself:

1. Where will it be used? - Indoors or outdoors?

2. How often will your banner be used? - Occasionally or daily?

3. How much space is available for the banner?

4. What is the right size to attract your audience? - It's important to choose the right size without over-crowding your display area.

5. Will you need to change the graphic? - Will you keep a constant message or need to alternate messages for different occasions or offers?

6. What is the right material for your needs? - Check the environment and select the right materials to meet your needs - banner vinyl, polyester or textile fabric.

7. What is your budget? - Once determined you can choose the best quality that will suit your needs.

Tension Banners

Our most versatile range of banners, designed to fit into any space and provide a seamless image and backdrop that gives maximum impact.

Our Tension Banner systems can be modular and linkable to create any size and shape, or simple stand-alone units, making them versatile and easy to use. They are available in a wide range of substrates.

Perfect for situations where you need to change your message frequently, such as a retail or a show environment.

Our Tension Banners are a popular and cost-effective solution that allows for the quick and easy changeover of graphics. Many also come supplied with sturdy nylon bags for ease of transport.

Our banners come in a wide variety of sizes, from a height of 1500 to 2900mm, and widths ranging from 300 to 1600mm. For more flexible solutions, our Uno and Stealth banners can be linked to create modular systems that can be re-configured to make the best use of the space you have.

Choosing the Right Tension Banner

1. Will your banner need to be packed up and moved regularly?

2. How often will the banner be re-used and need a change of graphic?

3. What is the size of the footprint that you need to use your banner within?

4. Do you have any height restrictions?
   As our banners can be provided in a range of heights to take advantage of vertical spaces or limitations.

5. Are you deploying in high traffic environments? As our banners are supplied with a range of bases to suit each space.

6. Finally, determine your budget and choose the best quality to suit your needs.

2. Street Flag
3. Wind Dancer

Flags

For both outdoor and indoor use, flags are an eye-catching option for displaying your message or giving directions.

There are a wide range of options available, from on-the-move street flags to our highly popular Zoom+ flags.

Flags are one of the most striking display options available.

Our flags can be made in a wide range of sizes, materials and finishes suitable for everyday environments such as tarmac, grass and for specialist environments including sand, snow and wall mounting.

No matter in which environment you wish to use our flags, we can provide a suitable construction and base that will serve your needs.

Caring For Your Flags

Flags are often exposed to the harshest conditions, even the highest quality materials and finishes will suffer if not treated with care. Here is our guide on how to take simple care of your flags:

1. **Consider the positioning of your flag to minimise the effects of the environment.**
   Air pollution can turn white areas grey, and too much UV light can cause fading and fabric deterioration.

2. **Reducing the flying time will preserve the life of your flag.**
   A flag will last between six and eight months when flown constantly, so taking down the flag when not in use will help it to last longer.

3. **Take note of the climatic conditions.**
   Flags should be taken down during poor weather conditions. Heavy rain and strong winds can increase the weight of the flag and put extra strain on the flagpole. Our flags are designed to withstand up to 18mph winds as standard.

4. **Washing your flag.**
   Flags can be machine washed with everyday soft detergents on a 30° wash. They should always be allowed to dry out completely before folding and storing.

Outdoor

Choose from our comprehensive range of banners and signage for displaying your brand in a wide variety of indoor or outdoor locations. Our range also includes tents, counters and backwalls, sign boards and barriers for pedestrian guidance, not to mention our choice of inflatables and parasols.

Giving your message the impact it deserves in outdoor locations requires specialist, high quality solutions.

Choosing the right outdoor display product is important to ensure maximum branding impact and to attract your desired visitors and customers.

It is also critically important to make the right choice that will suit your environment; display area size, possible weather conditions, visitor numbers, mobility and repeat usage.

A taller display or a double-sided banner may make all the difference to the impact and performance of your branding.

Some Tips To Take Care Of Your Products

Outdoor products are designed for moderate outdoor usage during the daytime. But even high quality materials deteriorate if not treated with care and used in extreme weathers.

1. **Choose your location carefully to minimise the effects of the environment.**
   Air pollution can turn white to grey, UV rays can also alter the colour of your visuals and cause deterioration on materials used.

2. **Optimise exposure time.**
   By storing your Outdoor products between each use, their lifespan will be extended.

3. **Consider climatic conditions.**
   All Outdoor products are not weather resistant in the same way. Heavy rain combined with high winds may increase the risk of deterioration of certain products. Follow the instructions given in the data sheets of each product provided.

POS Signage

Whether you are welcoming visitors or pointing the way, choosing the right signage is an important way of capturing attention.

We have a wide range of professional signage systems to choose from, including indoor, wall and poster frames, as well as free-standing and portable units for all your needs.

It is essential that Display Solutions match your interiors.

We have a comprehensive portfolio of Signage Solutions suitable for different settings such as: corporate office interiors, reception areas, public spaces as well as commercial, point of sale and retail environments.

Our versatile display solutions have a range of quality components for easy installation and a wide choice of fixing options for wall or ceiling suspension where required. They are also available in different finishes that perfectly match surroundings.

Before Choosing Your Display Solution, Please Consider the Following:

1. Do you need Free-Standing, Wall Mounted or Hanging Signage?

2. Does your display need to be printed or customised at all?

3. Does your signage need to be illuminated?

4. Do you plan to incorporate a device into the display like an LCD screen or iPad?

Our specialist Modular Solutions ranges Twista and Strata are made to order, with a wide range of fixing options and finishes to blend perfectly into your environment.

// The Advantages of our Range

Contemporary Designs

Custom Sizes and Colours

A3	AH413L/P
A4	AH414L/P
A5	AH415L/P

④ **Double Panel Support**

- Suitable for 4mm and 7mm thick substrates:
- 4mm - 10mm diam. x 20mm
- 7mm - 16mm diam. x 43mm with rotating feature for multi-angle fixing

Model	Code
10 mm (ø)	P0122
16 mm (ø)	P0121

⑤ **Panel Supports**

- Suitable for 4mm and 7mm thick substrates:
- 4mm - 10mm diam. x 15.5mm
- 7mm - 16mm diam. x 20.5mm

Model	Code
10 mm (ø)	P0113
16 mm (ø)	P0112

⑥ **Aluminium Rail Screw Fixing**

- Fix to ceiling or walls – cable fixings slot in and screw in to place
- Custom sizes available
- Complete with moulded end caps

Model	Code
1 metre	PR102
2 metres	PR101

⑦ **Adjustable Fixing Cable**

- 4m x 1.5mm Strata adjustable cable kit
- Supplied with rail fixings
- Can be fixed wall to wall, floor to ceiling, direct to wall - extra components required

Code	(h) x (ø) mm
P0109	4000 x 1.5 mm

⑧ **Rotating Edge Stand-offs**

- Edge stand-offs eliminate the need for an aperture in the substrate
- Suitable for 2mm - 10mm thick substrates in rail or screw options
- Choice of sizes: 34mm x 16mm diam. and 34mm x 25mm diam. with distance from wall or ceiling 18.5mm approx.

Code	(h) x (ø) mm
P0119	34 x 16 mm
P0120	34 x 25 mm

⑨ **Compact Variable Wall Plate**

- 16mm diam. x 25mm,
- 180° variable fixing
- 360° free moving or lockable
- Suitable for fixing to walls or ceilings

Code	(h) x (ø) mm
P0106	25 x 16 mm

⑩ **Compact Variable Cable Fixing**

- 16mm diam. x 25mm, 180° variable fixing
- Choice or rail fix or screw fix options
- Cannot be used with PO110 cable kit

Model	Code
Rail	P0107
Screw	P0108

⑪ **Floor to Ceiling Fixing Cable**

- 4m x 1.5mm Strata adjustable cable kit
- Supplied with screw
- Not suitable for compact variable fixings

Code	(h) x (ø) mm
P0110	4000 x 1.5 mm

⑫ **Insert for Screw Fixing**

- Suitable for PO109 Strata Cable Kits and Stand-off components

Code
P0116

⑬ **Insert Rail Fixing**

- Suitable for PO109 Strata Cable Kits and Stand-off components

Code
P0115

Counters

Designed for a wide variety of uses, our portable counters cater for almost any situation or occasion and are an ideal way to welcome your guests.

We have designed a comprehensive range of items in many shapes and sizes, most of which can support graphics that project your brand.

We provide counters for all budgets and requirements.

Our Counters can serve as display surfaces, lecterns, data pods, workstations, display towers, columns and plinths and the variations of what you can do with them is infinite.

You can also increase your impact by adding height and visibility with a header kit or flag. Our Counters are simple and quick to build with tool-less construction, they are made in-house and can be made to order if customisation is required.

Before Choosing Your Counter, Please Consider the Following:

1. How many times will it be used? Occasionally or regularly?

2. Do you need to transport it? And how often?

3. Will you need storage for catalogues for example?

4. Do you need to host visitors or give a lecture?

Physique
Range

Physique offers the largest range of flat pack counters for portable marketing. Physique is available in two specifications that give the same end look - one with fabric and one with a graphic (available for most designs). We can also manufacture our counters to your specification - please ask your dealer for details.

All standard Physique counters come with a standard foot. Locking castors and iPad holders are available for most counters too (at an optional extra cost).

Products come with a bag where marked, and we can also supply bags for all other products as an optional extra.

Step 2 : Choose your assembly option

MDF Freestyle

- MDF Tambour wraps finished in a choice of fabric covering (See Step 3)
- Supports a maximum load of up 75kg
- Attach graphics with hook and loop fastenings directly to the fabric
- Available for all products

Physique Pole Graphic

- Constructed with a unique twist and lock aluminium pole system
- Graphic is attached directly to the unit
- Lightweight structure
- Available for the Double D, Eclipse and Curved Workstation

Ideal as a greeting counter, workstation or product display unit

Luna

- Lightweight and very portable counter, ideal for road shows
- Low-profile shape with fine-grade fluted tambour for a smoother finish
- Twist and lock poles for added strength, integral shelf included

Model	Code	(h) x (w) x (d) mm
Freestyle	PK113-F	1000 x 860 x 400 mm
Corex	PK113-W	1000 x 860 x 400 mm
Carry Bag	CBB-005	
Case	AC311	

Eclipse

- Only available as a full wrap option
- Robust and offers large capacity of storage
- Optional graphic wrap also available

Counters

Backwalls

Our Backwall products include our Hop-up and Pop-up displays and Formulate also. They provide a simple way to create stunning backdrops, exhibition stands and displays.

They are lightweight, compact and practical, with cleverly designed systems that set up in minutes. Graphics are easily attached to a Pop-up or Formulate frame or left in place on a Hop-up.

Our range also allows for creative use of larger spaces, with linkable displays and large-scale graphics.

Choose a Backwall to create stunning visual impact.

Our Backwalls are large in stature but are also extremely portable and easy to use. Highly popular for events, commercial galleries, lounge road shows or just used as interior decoration, they are a creative backdrop for many situations.

Before Choosing Your Backwall, Ask Yourself:

1. What size is the area you need to cover?

2. What shape of Backwall is required?

3. What type of print media would you like to use?

4. How often will your display need to be refreshed or re-branded?

5. Does your Backwall display need to be reconfigurable?

6. How portable does your backwall display need to be?

7. Will lighting be required for your display?

8. How will your Backwall be transported?

// Our Range Of Display Backwalls

Formulate

A range of standard or custom structures, manufactured from strong yet lightweight tubular aluminium, providing a simple and portable framework which can be dressed with a tensioned fabric graphic.

Hop-ups

A lightweight Hop-up frame system with locking arms. Fabric graphics fit smoothly across the framework and attach in place once the frame has been collapsed using hook and loop attachments. Hop-ups can also be accessorised with overhead lights.

Pop-ups

Magnetic locking arms create an easy to use Pop-up frame structure. PVC graphics are held perfectly in position on the frame using graphic magnetic strips. Single or double-sided graphic option is available and Pop-ups can also be accessorised with lights and cases that convert to counters.

Embrace

Embrace is our Silicone Edge Graphic (SEG) Pop-up system with push-fit seamless fabric graphics, which hug a collapsible lightweight frame giving a sharp crisp image. Available in four sizes, Embrace allows you to erect a sophisticated display in minutes! Multiple frames can also be joined together to create larger seamless displays.

Xclaim

This is a simple lightweight, collapsible frame with magnetic locking arms and push-fit fabric graphics. Coming in a variety of shapes and sizes, Xclaim is designed to be portable and durable and can be set up and packed down quickly and easily.

Pegasus

This great range of adjustable tension backwalls have telescopic poles for adjusting the height and width, so they can fit all spaces and graphic sizes. Composed of lightweight aluminium tubes which the graphics slide onto.

Backwalls

Impact Pop-up Backwalls

Impact Pop-up Bundle

- 3x1 to 3x5 straight or curved frame, single or double-sided
- Supplied with mag bars, hangers and kickers, and a roll of magnetic tape for single sided use

Backwalls

Embrace
Backwalls

The ideal combination of a collapsible practical stand with push-fit seamless fabric graphic for a perfect finish.

Embrace

- Lightweight, simple assembly, anodised straight silver frame
- Complete with stabilising feet
- Perimeter channel bars connect to frame and hold push-fit fabric graphics to create crisp straight edges
- Can be used front only or with ends
- Additional bars can connect for double-sided use
- Frames can be linked together to create larger walls

Model	Code	(h) x (w) x (d) mm
3x1	EMB-1X3-S	2255 x 790 x 328 mm
3x2	EMB-2X3-S	2255 x 1523 x 328 mm
3x3	EMB-3X3-S	2255 x 2239 x 328 mm
3x4	EMB-4X3-S	2255 x 2972 x 328 mm
Straight Connection Bracket	EMB-SL-CON	
L Link Connection Bracket	EMB-LL-CON	

Perfect fabric tension for crisp seamless graphics

Frames can be linked to create wider or taller displays

Connection bracket

Transit bag

Locks together with clips

Channel bars for insertion of fabric graphics easily connect and slide onto collapsible frame
Easy snap arms

Easy push-fit fabric graphics go into channel

Xclaim

- Lightweight collapsible frame with magnetic locking arms and amazing push-fit fabric graphics
- Fabric fits smoothly across the framework and stays in place once the frame has collapsed
- Several variations can be created with only one frame

Model	Code	(h) x (w) x (d) mm
3x3	XCLM-3x3	2230 x 2230 x 315 mm
Cross shape	XCLM-5QP	2130 x 2130 x 315 mm
Easy to use magnetic rods

Push-fit graphics

Attach multiple graphic panels to each push-fit

Push-fit graphics for a quick change

Keep displays fresh, vary configurations
Shape and size of graphics can change to give a great new style

Pegasus

- Aluminium telescopic poles, adjustable up to 2500mm wide and high
- Vinyl or textile fabric graphics attached with pole pocket
- Lightweight and compact
- Carry bag with internal pockets

Modular Solutions

Exhibitions are one of the most effective showcases for your company to promote it's products to your audience in the most direct way. The ability to make a great first impression is critical in order to fire the imagination of passers-by.

Our inspirational exhibition stand designs and reconfigurable solutions lead the market today.

Our modular exhibition stand systems are highly versatile.
They use a range of materials to create different looks and
textures, from a grand scale to simple designs.

It's important to make them impactful and cost-effective at the same time.
You can choose from our range of stand designs, or work with our 3D CAD Design
Team to create a stand that fits your exact requirements perfectly.

Once created, our kits can be assembled quickly and easily to show off your brand.

// A Solution For Every Need

Modular stand designs are flexible,
re-configurable and re-usable. After
initial purchase you can re-use the
stand as many times as you wish.

They can be re-configured to freshen
the appeal, selecting the components
you need for the space, purpose and
location, or adding new elements to
fit a new space. Graphics can also be
updated to give your existing stand a
fresh new look if required.

// Services Available

From an initial design briefing to production of inspiring concepts, to fully-specified stands,
we can design, quote and build a display solution that meets your exact requirement as a
full end-to-end service.

3D CAD Design
Our design team offers
standard and bespoke
display solutions.
We have an extensive
parts library to suit
your specification and
individual items, such
as literature holders
to complete modular
stand designs.

**Concepts
& Quotation**
Our experienced
team will craft
the solution
to your exact
requirements.

Pre-build
Manufacturing is
completed in our
own production
facilities across
Europe. Clients
are invited to
inspect pre-build
stands before
they are shipped.

Graphics
Our large-scale
print facilities
can provide all
your graphics to
suit your needs.

**Installation
& Dismantle**
We can handle all
your stand building
requirements from
design and build
to transportation,
installation and
dismantling, as
required.

Modular
Solutions

Linear Range

The Linear range is ideally suited for applications such as image walls, stands and office furniture.

We recommend the use of rollable or rigid PVC to partially or completely cover the structure.

- Anodised aluminium profiles with four connectors
- Rollable PVC (550 micron) or rigid panel (5mm) covering
- Supplied with a roll of steel tape (optional magnetic tape, EM301 not included)
- Optional accessories available
- Manufactured to order

Linear Executive Wave

Modular Solutions

Vector Range

The Vector range is available in several models, it offers an optimal visual impact for original designs that adapt to every environment: showroom, points of sale, retails, shows, museums and many others.

Its textile display with silicone edged gasket makes it one of the simplest communication solutions on the market.

- Anodised aluminium profile
- Eight different profile depths for backlit or non-illuminated use
- Self-supporting double-sided or wall-mounted
- Textile graphic with silicone edged gasket
- Optional accessories for 40 and 50mm profiles
- Manufactured to order, custom sizes available on request

Simple, quick assembly

Fabric graphic with silicone edging inserts into frame

- Double-sided self-supporting profile
- Screw-in bracket assembly
150 mm LED
- Double-sided self-supporting profile
- Screw-in bracket assembly

Formulate
Range

Our Formulate range allows the creation of curves and original shapes.
These are tubular aluminium structures with printed textile cladding.

The assembly of our Formulate structures is carried out with ease. The use of connectors with push buttons and the locating system on each element allows simple and tool-less assembly.

- Anodised aluminium tubular structure 30 or 50mm diameter
- Push button connectors
- Double-sided graphics
- Fabric graphic is pulled over the frame and zipped closed
- Optional accessories with universal mounting kit available
- Manufactured to order

Easy matching system

Fabric graphic zips over frame

Modular Solutions

Arena
Range

Our Arena system is an aluminium tubular stage structure, these particularly stable structures are both modular and scalable.

The different sections can be assembled and reused according to the needs of each project.

- Tubular aluminium frame 25mm diameter (approx)
- Straight sections available in nine different lengths
- Supports up to 100kgs over a 2m span
- Use in structures up to 6m long without a down section
- Graphics attach by bungee fixings
- Structure is assembled with bolt and wing-nut fixings

Arena Kit 2

Versatile and scalable solution

Add shelving, tablets or literature holders to increase functionality

Arena Kit 1

Sections assembled with wing-nuts and bolts

Can be used with traditional vinyl graphics or on-trend textile graphics

Zed-Up Lite

- Double-sided acrylic and anodised
  aluminium collapsible shelves
- Available in three sizes
- Complete with heavy duty hard case

Model	Code	(h) x (w) x (d) mm
A5 (6 pockets)	AS318-002	1120 x 210 x 284 mm
A4 (6 pockets)	AS315-002	1460 x 256 x 370 mm
A3 (6 pockets)	AS319-002	1420 x 470 x 370 mm

Hard case included

Available in A5, A4
and A3 sizes

Literature Holders

Injection Moulded System Literature Holders

- Smoked grey injection moulded literature holders
- Suitable for mounting onto Linear (direct mounting), Vector, Formulate and Aero+ stands (with optional Universal Clamp FX839)
- All sizes can be mounted on the left or right hand side of the literature holder or wall mounted from the back
- Available in portrait for DL, A5 or A4

Model	Code	(h) x (w) x (d) mm
A4	AH5A4P	330 x 254 x 55 mm
A5	AH5A5P	250 x 182 x 45 mm
DL	AH5DLP	250 x 132 x 45 mm

Can be side mounted left or right

Suitable for mounting onto Linear Vector, Formulate and Aero+ stands

Three sizes to choose from; DL, A5 and A4

Xanadu

- Four black fabric A4 pockets
- Three part construction

Model	Code	(h) x (w) x (d) mm
Xanadu	WH431	1365 x 280 x 380 mm

Great lightweight option

Quick setup

Carry bag included

1. Tube AB120
2. Zeus Case

Cases

We know that using lightweight luggage to transport your structures and visuals helps to make your work easier.

Our range of bags and cases are made of flexible and rigid materials adapted to your specific transport or storage needs.

Option to compartmentalise the inside

Linear

- Large wheeled carry case for transporting Linear or Vector extrusion and kits
- Optional three tier inserts configurable to store different Linear extrusions
- Stackable for easy storage, complete with support straps for extra security

Model	Code	(h) x (w) x (d) mm
Linear	AC506	1300 x 740 x 360 mm (External dimensions)
Linear (without compartments)	AC506-001	1300 x 740 x 360 mm (External dimensions)

Interior compartments

Large wheels for easy transportation

Graphic Drum

- Choose from a range of sizes to enable you to transport graphics safely and securely
- Manufactured from tough yet lightweight polyethylene

Model	Code	(h) x (ø) mm
850 mm (h)		
400 mm (ø)	AC305	850 x 400 mm
300 mm (ø)	AC306	850 x 300 mm
1020 mm (h)		
400 mm (ø)	AC365	1020 x 400 mm
300 mm (ø)	AC366	1020 x 300 mm
Carry handle

Secure fastening

Ideal for transporting graphics

Available in two heights: 850mm and 1020mm

Zeus

- Wheeled lockable Pop-up case designed for safe transportation of Pop-up frame, fixings and graphics, manufactured from tough moulded polyethylene (MDPE).
- Will accept one 3x5 curved or straight Pop-up frame with graphic panels and mag bars with internal divider to protect graphics included
- Optional folding tabletop and graphic wrap to convert case into a counter
- Tabletop supplied in beech as standard, three extra colour options are available ● ● ○

Model		Code	(h) x (w) x (d) mm
Zeus		AC338	970 x 610 x 395 mm (External dimensions)
Tabletop Beech	●	CO401-C	15 x 640 x 420 mm
Tabletop Black	●	CO401-B	15 x 640 x 420 mm
Tabletop Silver	●	CO401-S	15 x 640 x 420 mm
Tabletop White	○	CO401-W	15 x 640 x 420 mm

Ideal for transporting Pop-up frames and graphics as well as converting from case to counter!

Case without graphic

Optional iPad* tabletop holder available: C0401-IPB/S/W ● ● ○

*iPad not included and not available to purchase

Stealth Case

- Versatile and adaptable case which can house components and graphics for the Stealth tension banner system (See Tension Banners section on pages 18 and 19)
- Separate compartments securely hold two Stealth units one flexible joining panel and one graphic wrap
- Optional folding tabletop to create a counter
- Optional fabric wrap to personalise your counter

Model	Code	(h) x (w) x (d) mm
Case	AC331A	1125 x 525 x 440 mm
Folding Tabletop for case (case not included)	CO332	565 x 475 x 15 mm
Case Graphic Wrap (case not included)	CO333Z	800 x 1600 mm

Great case that converts simply to a counter using optional folding tabletop and graphic wrap

AB120CM	1280 (max) x 155 x 155 mm
AB120DM	1580 (max) x 155 x 155 mm

Mag Bar Bag

- Keeps your Pop-up mag bars safe and clean while in transit or after use in storage
- Fabric bag with hook and loop locking system
- Capacity to house up to 21 mag bars
- Complete with carry handle

Code	(h) x (w) x (d) mm
AB104	735 x 110 x 70 mm

Lighting

Make your displays come alive with great lighting that attracts attention.

Focus attention on the elements of your display that you want to highlight from our range of LED lighting.

LED
Lighting

LED lights use less energy, run cooler and last longer; reducing your electrical power requirements at exhibitions and shows.

- Bespoke design specifically for display and exhibition environments
- Greater efficiency means lower power consumption and higher light output
- Safety and CE approved

Measuring Light:
Watts and Lumens Explained

Traditionally we have measured light in watts, however watts are a measurement of power and not light output. With the emergence of new and more efficient LED technology, lumens (lm) are the preferred measurement of light.

One lumen is equivalent to the light emitted from one wax candle. For example; a traditional 40 watt light bulb has a lumen output of approximately 450lm. Our mix and match range of LED lights below have a lumen of 1200 but only use 12 watts of energy. They still give off bright white light, but use only a fraction of the energy compared to traditional halogen lights.

High-end LED lighting –

Perfect for illuminating large exhibition areas

- 80 watt mains floodlight and a low consumption of 12 watt (1200lm). Single kit includes one spot (light only) and one 2.5m linking lead.
- Double kit includes two spots, one cable, one transformer and one 2.5m linking lead. Link up to five lights from one transformer. Fitting for Aero+, Linear and Vector included (Universal fitting for other systems an option).
- Power lead with UK or Euro plug (cross head screwdriver needed)

Made to Order

Many of our products can be adapted and made to your specific requirements. Therefore if you require bespoke graphics or special finishes, we invite you to contact one of our advisers for a tailor-made quote.

From flags and banners to corporate tablecloth printing we can adapt the print and shape of our media to suit your needs.

We can even adapt media to suit your own bespoke structure such as security barriers.

In order to be able to do this we invest in specialist printing and finishing skills to create the best looking and quality finish to each display product.

With a wide range of printing, cutting and finishing techniques including UV, Dye-sub and Latex printing, plus digital laser cutting and expert sewing machinists, a top-class professional finish is certain to give your brand the impact it deserves.

Our Product Range
We are dedicated to delivering the widest choice of products from cost effective, to premium quality. We promise to continuously search for new and pioneering ideas bringing innovation and excitement to our complete range of portable display products. Our products cover a broad range of needs from simple cost effective display solutions to more comprehensive and specialist displays for both one off and semi-permanent use.

Design and Patent
Some of the products in our catalogue carry a Worldwide Patent, some carry a Design Patent. All of our unique products are designed in the UK / USA and designs are registered.
Due to variations in graphic substrates, graphic thicknesses stated are provided as a guide only. Always check the suitability of your substrate on the display unit before application.
